Above all, here at **BL King Consulting** we are a technology problem solver; Your company is the expert in making and selling the widgets that you do; and if that's not Information Technology or Information Security you're probably struggling with it. If you've outsourced your IT it's probably to a company that either hires inexperienced employees who are learning on your dime or they are charging you astronomical prices. We solve your IT and IS problems practically, as though your money were our money, and we implement those novel and practical solutions at, what is most times, a cost savings.

Core Competencies

- We find inexpensive technical solutions that work, for your most complex problems.
- Analyzing complex multi-million dollar systems and providing quantifiable risk assessments with actionable recommendations
- Our specialty is the practical application of efficient Cybersecurity principals
- Our focus is providing technical, hands-on leadership to identify cost-efficient solutions for complex problems
- We have a highly trained and experienced team that focus on software security architecture, software/quality assurance, flaw & vulnerability identification, and black box penetration testing that is both practical and cost-efficient
- Architecture, design, implementation, IV&V, risk assessment, and reporting in DIACAP, ICD-503, DoD RMF, NIST RMF, FISMA
- Authorized License reseller for G-Suite and WWPass.

Differentiators

- We only resell products that offer a cost savings to traditional IT and provide a meaningful and reputable service.
- We don't force one product over another, rather we partner with these companies to offer discounts and package deals.
- Performance in both the Defense Industry and the Commercial industry guarantees that the best of breed solutions are presented.
- Engaged and passionate associates that enjoy solving problems.
- Powerful culture of innovation, collaboration and teaming.
