BL King Consulting

ADVANCED NETWORK DEFENSE

Taking breach prevention to the next level

STOP BREACHES. MONITOR ALL COMPUTER, SERVER, AND NETWORK ACTIVITY 24X7 WITH MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE

Bl King Consulting's advanced network defenses monitor all of your systems activity with artificial intelligence to stop attacks dead in their tracks. Activity fused with open-source threat intelligence identifies attacks from their very first ping. When paired with your IT Team we prevent the fox from watching the hen house.

Key Service Capabilities

AI-Powered Detection

- Combs through billions of activity records every day
- Identifies anomalous activity that indicates reconnaissance.
- Finds the indicators of compromise (IOC) that humans would otherwise miss
- Human monitored from a single pane of glass

Intelligent Prevention

- Prevent malware and ransomware from executing
- Stop advanced threats with malicious behavior, memory threat , and credential hardening protections
- Stop threats targeting cloud workloads and cloud-native applications
- Automate the identification of cloud threats with detection rules and machine learning (ML)

- Disrupt advanced threats with behavior-based prevention

Rapid Response

- Rapid response starts with collecting system details and automated host-risk analysis
- Accelerated remediation with built in remote response actions
- Detailed activity records enable analysts to quickly identify foot-holds and attack types

Forensic Analysis

- Billions of activity records enable analysts to confidently identify all systems and files involved in the attack
- Attribution may prove vital in law enforcement activities, defense department reporting, and corporate espionage litigation
- Ensures clear, consistent, and correct communication to all stakeholders throughout an incident

KEY BENEFITS

- Stop Attacks Before They Start
- Isolate and Contain Ransomware
- Identify Weaknesses
- Shore up Defenses
- Comply with Governance (CMMC, PCI DSS, Insurance)
- Protect your Customers Data
- Have confidence that your IT team is performing securely

COMPUTERS THAT JUST WORK - A SUPPORT TEAM THAT WORKS UNTIL THE PROBLEM IS RESOLVED

BL King Consulting's service offerings are built specifically to support the remote worker and office worker alike. Our proactive monitoring and patch management ensure that your systems are always up to date and working as designed. When they aren't we provide unlimited help desk support with a custom help desk designed and branded just for you, as well as a phone number for talk and text.

Key Service Capabilities

Unlimited Help Desk
- No per ticket/hourly billing
- Staffed m-f 9-5
- 5 Convenient methods to contact the help desk: web form, chat, phone, voicemail, and texting
- Available to all employees
- Service level agreements available

Asset Management
- Provision and de-provision computers as needed
- Recycle computers after sanitization of sensitive data
- Server and network device management
- BYOD and company owned mobile device provisioning

Remote Maintenance And Monitoring
- We conduct nightly maintenance on your computers to ensure they run at peak performance
- Patches and reboots are scheduled for a weeknight
- Monitoring for missing lockdowns, missing patches, failed services and other issues likely to cause performance degradation

Vendor Management
- We work with mobile device vendors, computer vendors, internet service providers, and more.
- We provide licensing for google and Microsoft directly, giving you just one invoice

- No more waiting on the phone for an internet outage

Vulnerability And Patch Management
- The number one best defense is patch management
- All attacks start by exploiting a weakness that usually has a patch available
- Not all patches are applied by patch management systems
- 3rd party patches are not always updated by their auto-update system
- Vulnerability scanning finds missing patches and alerts staff to weaknesses

On-Site And Remote Support
- We can provide on-site support dependent upon your package, your company size, and your location
- Most of our support will be remote, but we are built around remote workers
- Whether you're in the office or working from the beach we will support you
- Project support for those projects that are above our standard support arrangement, we bill hourly at a rate negotiated in your proposal

CYBER STATS

- 95% Of Cybersecurity Incidents At SMBs Cost Up To $1.2 Million
- 60% Go Out Of Business W/In 6 Months
- 37% Of Companies Hit By Ransomeware Had Fewer Than 100 Employees
- 1 In 323 Emails To SMBs Were Malicious
- DNS Data Show That 1 In 10 Organizations Already Have Malware Traffic On Their Network.
- The Average Duration Of A Cyber Insurance Claim Was Three And A Half Years.
- PCI DSS Fines Range From $5,000 To $100,000 -- If You Process Credit Cards You Are Subject To PCI DSS
